

KHAYYAM ALMAS

SENIOR QA AUTOMATION & AI-DRIVEN TEST TOOLS ENGINEER

SUMMARY

Senior Test Automation Engineer with 5 years on systems people cannot opt out of — hospital registration and appointments, then tax administration and e-government platforms. Strong in **UI test automation** (Playwright / TypeScript, Java / Selenium) and CI/CD integration. Now building the **AI tooling that runs the quality cycle itself**: from the requirement document, to the test case set, to the automated suite, to the defect report.

WORK EXPERIENCE

Cybernet LLC | Senior Software AQA Engineer

Jan 2026 – Present · Baku, Azerbaijan

- Designed and shipped **three AI-driven QA tools** covering the full cycle — specification analysis → test case set in Zephyr → Playwright UI automation → Jira bug ticket with evidence — and rolled them out to the whole QA team as versioned internal GitLab **plugins** under protected-branch and CODEOWNERS approval governance.
- Built the **REST / MCP integration layer** over Zephyr Scale (Data Center), Jira, Confluence and GitLab: folder creation, full-payload test case import, owner assignment, execution results and Jira ↔ Zephyr traceability links.
- Generated complete test case sets from requirement specifications using **ISTQB techniques** (equivalence partitioning, boundary value analysis, decision tables, state transition, RBAC matrices), delivered with RTM and quality gates.
- Extended UI regression coverage with **Playwright + TypeScript** (Page Object Model, Allure) alongside the Selenium / Java / Cucumber suite, on GitLab CI/CD with automated daily reporting.
- Defined and executed Test Plans and Test Strategies, owned defect management in Jira, and **mentored QA engineers** on automation practices and code review.
- Tested the **records-management side of a state tax platform**: electronic documents routed between authorities, multi-step approval and signing chains, case folders from request through status changes to closure, and an integration with an external document-management system including its AI-assisted routing suggestion.

Cybernet LLC | Middle Software AQA Engineer

Feb 2023 – Jan 2026 · Baku, Azerbaijan

- Tested the document registration and approval flows — incoming, outgoing and internal documents, visa chains, postal dispatch and return, and parallel approval with external bodies — plus the **online cash-register reporting system**: report form definitions and cash-operation summaries at taxpayer and premises level.
- Developed the UI automation framework using Selenium WebDriver, Java, Cucumber and JUnit, and wired it into GitLab CI/CD pipelines for continuous execution.
- Produced actionable test reports with Allure, automated their daily distribution, and linked every automated test back to the manual case it came from.
- Contributed to Test Plans and Test Strategies aligned with project requirements, and managed defects in Jira through to resolution.

Rainpark Solutions | Middle Software AQA Engineer

Aug 2021 – Feb 2023 · Baku, Azerbaijan

- Owned quality on a **hospital information system** — doctor, patient and staff records, online and walk-in queueing, appointments, payments, routing between departments and the flows around them.
- Wrote and ran the manual cases behind those flows, then automated them — UI and backend suites in Java, Selenium WebDriver, JUnit and Cucumber, on a BDD framework built from scratch with the Page Object Model.
- Automated REST API testing with Postman and REST Assured (JSON deserialization), and managed defects and test cases in Jira.

TECHNICAL SKILLS

AI-Driven QA Tooling

LLM-assisted test case generation · AI agent workflows for QA · Model Context Protocol (MCP) integrations · prompt engineering for test design

UI Test Automation

Playwright (TypeScript) · Selenium WebDriver (Java) · Page Object Model · Cucumber (BDD) · JUnit · TestNG

Test Design & Management

ISTQB test design techniques · Zephyr Scale (Data Center) · Jira · Confluence · RTM

CI/CD & Reporting

GitLab CI/CD · Git / GitHub / GitLab · Allure Report

Programming

Java · TypeScript · JavaScript (Node.js)

API & Process

REST Assured · Postman · Agile / Scrum · Test Plan & Strategy · Mentoring & Code Review

CERTIFICATION & EDUCATION

- ISTQB CTFL
- IATELS — AI Test Tools

Full Stack Automation Engineer

TechPro Education

Bachelor of Civil Engineering

Azerbaijan University of Architecture and Construction

2006 – 2010

LANGUAGES

Azerbaijani — Native

English — Intermediate

Russian — Intermediate

SOFT SKILLS

Problem solving · Time management · Adaptability · Good communication · Self-study & research
